Performance (as at May 31, 2017)	3 Months	6 Months	1 Year	3 year	Since Inception ¹
Portland Global Energy Efficiency and Renewable Energy Fund LP Series A	1.8%	3.1%	5.5%	8.6%	7.9%
Portland Global Energy Efficiency and Renewable Energy Fund LP Series F	2.0%	3.3%	6.0%	9.0%	8.2%

HOW THE PARTNERSHIP IS MANAGED

The investment objectives of Portland Global Energy Efficiency and Renewable Energy Fund LP ("Partnership") are to provide income and above average long-term returns by investing primarily in the B units of Global Energy Efficiency and Renewable Energy Fund ("GEEREF"), advised by the European Investment Fund ("EIF") and sub-advised by the European Investment Bank ("EIB").

To achieve the investment objectives:

- The Partnership intends primarily to invest in the B units of GEEREF, a private equity and infrastructure fund of funds, investing in Regional Funds, providing equity or quasi equity primarily for energy efficiency and renewable energy projects in developing countries and economies in transition. The B units feature a preferred return mechanism and faster return of capital over the A shares currently held by public sponsors: Germany, Norway, and the EIF (on behalf of the European Commission representing the European Union).
- When the Partnership subscribes for the B units of GEEREF, it is required to commit to investing a fixed amount of capital to GEEREF over time. Pending the full investment of the Partnership's commitments, which may take several months or years, the Partnership may invest in a variety of other investments, including income producing private and public debt and equity securities, either directly or indirectly through other funds.
- The Manager may hedge part or all of the Partnership's non-Canadian dollar exposure back to the Canadian dollar from time to time.
- The Partnership may borrow up to 7.5% of its total assets from a bank, prime broker, the Manager or its affiliates.

KEY REASONS TO INVEST

- Opportunity to invest, through the Partnership, alongside Supranational Institutions and Sovereign States (EIB on behalf of the European Union, Germany and Norway)
- Preferred return mechanism of GEEREF's B units:
 - Faster return of capital than A shareholders
 - Enhanced returns
 - Targets above average long-term returns
- GEEREF has access to specialized infrastructure funds/geographies exposed to high growth
- GEEREF investments increase access to renewable and affordable energy for underserved communities in emerging nations
- GEEREF's institutional quality oversight and governance
- Targeting 8% distribution per annum to be declared quarterly commencing on or before quarter ended December 2017 and based on the net asset value of the units at that time.

ATTRACTIVE RISK/RETURN PROFILE OF GEEREF

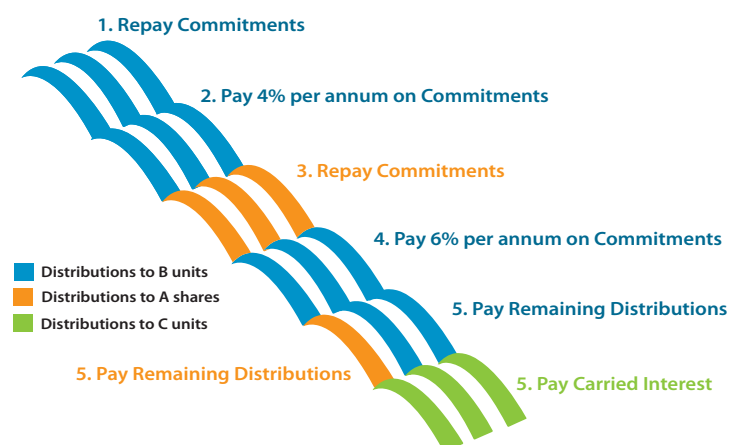

Opportunity to invest, through the Partnership, alongside Supranational Institutions and Sovereign States.

GEEREF was launched in 2008, capitalized with approximately €112 million in A shares from the European Union, Germany and Norway.

Additional €110.1 million has been raised from new private investors in B units of GEEREF, raising GEEREF to €222 million.

The new private investors in B units are a select number of investors and limited partnerships including the Partnership.

A waterfall distribution provides holders of B units of GEEREF (i.e. the Partnership) over 50% downside protection, a preferred return and accelerated liquidity compared to GEEREF A shareholders and seeks to provide enhanced returns as illustrated below.

RISKS

While the Manager and GEEREF's Front Office investment team (GFO), through the advisory services of the EIF and the EIB, exercise due diligence throughout the investing process of the Partnership, no guarantees can be given regarding returns on your investment or the risk of loss.

The Manager believes the following risks are key to the Partnership's performance: no assurance of return, dependence on the Manager, dependence on GFO, illiquidity of the Partnership investments, including those in Regional Funds, equity risk, currency risk, legal jurisdiction, risks related to the Regional Funds and other investments in specific sectors, risk of not meeting capital calls and valuation of the Partnership's investments.

Investors should consult with their financial advisor about the risks prior to investing in the Partnership. Please read the "Risk Factors" section in the Offering Memorandum for a more detailed description of all the relevant risks.

FUND COMMENTARY (as at March 31, 2017)

During the period from December 17, 2013 to May 17, 2015 the Partnership made five commitments to invest a total of €4,250,000 in B Units of GEEREF. In March 2017, the Partnership, fulfilled a requirement to increase its subscriptions and so currently has contributed €12,267,056 for 1,226,703 B units, at a value of €10,000 each, representing 86.08% of its commitment. The €12.3 million investment has been hedged to the Canadian dollar.

GEEREF's objective is to invest in Regional Funds (as defined in the Offering Memorandum) that invest their assets in projects and companies involved in energy efficiency and renewable energy which enhance access to clean energy in developing countries and economies in transition.

As of December 31, 2016, GEEREF had committed to invest approximately €148.1 million in eleven Regional Funds, liquidate and so realize €17.2 million from one Regional Fund and positively received submissions from two successor Regional Funds, with GEEREF committing €20 million into one by end March 2017. GEEREF is also working on coinvestment/direct investment projects which are expected to materialize in 2017.

The portfolios of each of the eleven Regional Funds comprise a total of 84 investments. Two of these Regional Funds have finalized their investment periods.

GEEREF closed its offer of B Units on May 31, 2015 having originally intended to close by November 5, 2013. A consequence of this delay has been: (i) the extension to accept more subscriptions into this Partnership until no later than November 30, 2017 and; (ii) the deferral to pay quarterly distributions until the quarter ended December 2017.

Over the last year, as the Partnership welcomed an increasing number of investors and existing investors who increased their investment, the Partnership's net assets have risen. Also, given the GEEREF offer is now closed, the Partnership's commitment is now capped. Therefore in anticipation of ongoing investor enthusiasm for the Partnership, the Manager has looked to complete the investment objectives of the Partnership by investing primarily in the B units of GEEREF and a portfolio of income producing private and public debt and equity securities.

In September 2016, the Partnership initiated a commitment to invest in Newlook Capital Industrial Services LP (Newlook). Headquartered in Burlington, Ontario, Newlook has been created to provide an opportunity for investors, by way of a tiered investment structure, to invest in a portfolio of Canadian industrial services companies. Newlook's investment strategy consists of sourcing and acquiring interests in companies that have a component of their revenue arising from recurring service provision, which assures code compliance, a sustainable competitive position, high relative market share and a history of generating positive cash flow, and where Newlook's management see an opportunity to enhance value by driving operational improvements. Initially, Newlook has majority ownership of three industrial companies: Multiservice Group Inc. (Multiservice), Direct Elevator Service Ltd. (Direct) and True Canadian Elevator Maintenance Company Ltd. (True Canadian). Multiservice, founded in 1985, operates in Western Canada with offices in Edmonton and Calgary and installs and regularly inspects gas detection systems as mandated by the Alberta Fire code, serving over 1600 customers. Direct, founded in 1988, is an elevator maintenance company based in Scarborough and servicing the Greater Toronto Area. Similarly, True Canadian, managed by a technician with 30 years of experience is in the elevator maintenance and modernization business, based in Etobicoke. The management of Newlook will seek to divest its investments at higher values than those paid on acquisition after growing them into larger businesses that are strategically relevant for corporate buyers or larger private equity groups. Newlook is expected to be terminated in 5 years, effectively by end September 2021, subject to three potential one year extensions at the discretion of the General Partner of Newlook. The Partnership is also a modest shareholder of the General Partner of Newlook. As at March 31, the investment in Newlook represented about 5.9% of the Partnership. In keeping with its investment strategies, the Partnership intends primarily to invest in the B Units of GEEREF and so whilst pleased at this opportunity, currently anticipates that its

OWNERS. OPERATORS. AND INVESTORS.

May 31, 2017

investment in Newlook will eventually be up to about 10% of the Partnership and the Partnership's stake to be about 5% of Newlook.

On March 30, 2017, the Partnership received its second distribution of €347,045 in lieu of partial divestments from Regional Funds. These distributions reaffirm the intent to set in train the Partnership's payment of quarterly distributions from the 4th quarter, 2017, having first closed the subscription period by no later than November 30, 2017

Market Overview

The economics of renewable energy generation are evolving differently in developed countries and developing ones. While the subsidies in the United States of America, European Union and other developed countries are being reassessed due to their high cost, the overall market in the renewable energy and energy efficiency sectors in developing countries is in fact benefitting from an increasingly cheaper supply of renewable energy technologies and strong competition between technology providers.

Traditionally, renewable energy has been largely driven by sustainability targets and concerted regional efforts to diversify existing energy portfolios. Photovoltaic (PV) global installations has continued to rise since 2006, largely driven by the continued drop in capital costs – the price of PV modules has fallen by over 30% year on year since 2008. This reduction in capital investment has allowed solar power to be viewed as a viable energy alternative to traditional power generation from coal, natural gas, and/or nuclear. Countries in the Middle East have included

solar as part of their investment into a wider energy portfolio, a possible option in their "post-oil" future. For most countries (with the exception of some in Western Europe and South America), renewable energy continues to be viewed as an energy alternative within a wider portfolio where coal and natural gas play leading roles.

The drop in crude oil prices has caused many nations to reconsider the allocation of their current subsidies (both towards renewables and towards fossil fuels), which has presented an opportunity for renewable energy to transition from an energy alternative and into an energy staple. With crude oil prices cut by more than half, at least 27 countries have elected to decrease or end subsidies that currently regulate fuel costs for electricity generation (including coal and natural gas). Fossil fuel subsidies have previously been criticized for distorting the energy markets in favor of sources that, without their support, would not be economically viable.

It remains our view that GEEREF is playing its part in meeting the challenge of climate change. Its investors are contributing capital to a first generation of renewable energy projects. These projects are giving greater and cleaner access to electricity to select populations while generating attractive financial returns. Industrial services in Canada are regulated by codes of compliance which by their nature require technical services and generate recurring revenues in areas which benefit and protect the societies they serve. Market drivers for both electricity generation and industrial services like elevator maintenance and gas detection include increasing urbanization and technological development. We therefore believe the Partnership's investment in Newlook is complementary to its investment in B units of GEEREF and towards fulfilling its investment objectives.

† Annualized, Inception Date of October 31, 2013.

*Generally only available through dealers who have entered into a Portland Series F Dealer Agreement

** Generally only available to certain institutional and other investors

1. Accredited Investors as defined under National Instrument 45-106.

2. For investors who are not Accredited Investors, the additional investment must be in an amount that is not less than \$500 if the investor initially acquired Units for an acquisition cost of not less than \$150,000 and, at the time of the additional investment, the Units then held by the investor have an acquisition cost or a net asset value equal to at least \$150,000, or another exemption is available.
